Report of Superintendent of Schools

To the Superintending School Committee and citizens of the Town of Buxton, I herewith submit the annual report.

The year 1921-22 has brought with it a new and varied program for advancement along well defined lines of new educational projects. In order to accomplish these ends it is absolutely essential that we have united public opinion and support behind all endeavors in this direction. We can hardly estimate the real worth of our schools to town, state, and nation. Although the upkeep of the schools necessitates relatively large expenditures, yet these expenditures are in the right direction, and yield the largest returns and represent our most valuable investment.

There is one very important consideration from the standpoint of economy; that is the teacher. Does it pay to hire the untrained teacher? It is possible to secure this teacher at about half the cost of the experienced and carefully trained teacher. It takes several years to prepare a teacher in a competent manner, and then this teacher will take up the work where the largest financial reward can be obtained.

Attendance of every pupil is required as a part of the school plan. Failure to attend school means irretrievable loss on the part of the child; a loss on your investment; a loss from the financial return of the state. Our schools are graded to meet the needs of the boy, according to his age and development. If he is retarded by non-attendance, then he naturally loses all interest in school work. It is inevitable that the system fails to secure its end, and the attainment of our object defeated.

At the present time consolidation of the smaller schools is strongly urged to avoid the cost of the maintenance of a school of only a few pupils; and more important to give these pupils the advantages of a trained teacher. We have been fortunate in securing excellent teachers in these small schools, and satisfactory work has been accomplished but of course these teachers cannot be retained.

Physical Education

Another requirement has been brought to our attention. We must not forget that the welfare of the child means more than mental development. We have become aware of another phase of school life much more basal and fundamental in importance. For "Childhood is the time to accumulate a physical capital necessary to meet the emergencies which arise in every life." Special attention should be given to ventilation and light, and maintenance of proper temperature in school buildings. In many towns examinations are made of teeth, adenoids, malnutrition, etc.; and physical directors and supervisors have been employed. The suggested program includes two 3-minute drills daily; setting up exercises, posture exercises, one 20-minute lesson daily, marching gymnastic games, 20 minutes a week devoted to hygiene.

Repairs

The building at Salmon Falls is now in good condition as the result of a thorough renovation. The improved environment of buildings which have been thoroughly cleaned and whitened cannot fail to result in a helpful influence for a better school.

Pupils should be taught through the improvement leagues and other agencies that they have a responsibility and a part in the preservation of school property; and an interest in the progress and standing of their school.

Several buildings need to be shingled this year. The buildings need attention in many respects if we exercise the

economy due to prevent depreciation of school property and also comply with the strict requirement of the new law relative to sanitation.

The new water system installed at Bar Mills has given excellent satisfaction. The system in the high school has been the source of considerable expense in upkeep, the repair of pump, and new parts necessary for the efficient working of the pump. Should the system at Bar Mills continue to be as efficient from the standpoint of economy and convenience, it would seem desirable to have a motor driven system installed in the High School. It should be obvious that there is an urgent need of painting the high school building as well as the one at Bar Mills; not only as a matter of economy but as a necessity in the preservation of these buildings.

YOU ARE REQUESTED TO NOTE particularly the phases of the new law found in this report, that pertain to the apportionment of the state school fund. From the estimated apportionments from the state another year it would seem that the amount apportioned the town of Buxton would be somewhat less than in past years, in that in the past the valuation has been a part basis for apportionment; and now the school census, teaching positions, and aggregate attendance are deciding factors. It is essential that pupils attend school regularly, otherwise we shall lose on the aggregate attendance basis. Children out of school mean dollars out of the town. In previous years the valuation of the town has been the basis of distribution of two-thirds of the school fund.

New Law

Extracts from School Laws 1921

(From Chap. 173 P. L. 1921)

Sec. 1. A tax of three and one-third mills on a dollar shall annually be assessed upon all the property in the state according to the value thereof and said tax shall be assessed

and collected in the same manner as other state taxes and paid into the treasury. To the fund resulting from said tax the treasurer of state annually shall add a sum equal to six per cent of the permanent school fund, as provided by law, and a sum equal to one-half the amount received by the state from the tax on the franchises of savings banks and on the deposits of trust and banking companies as provided by law. The sum total of the amount so assessed and collected shall be designated the state school fund.

Sec. 6. On the basis of information furnished to the state superintendent of public schools by the return of educational statistics for the year ending July first (1922) . . . and annually thereafter as provided for by (Sec. 51, Chap. 16) said state superintendent of schools shall apportion to each town the sum of one hundred dollars for each teaching position, or a corresponding fractional part of one hundred dollars for each fractional part of a teaching position maintained in the elementary and secondary schools of such town.

Sec. 7. On the basis of the school census of the towns on April first (1922) . . . and annually thereafter as returned under the provisions of Section fifty of Chapter Sixteen of the Revised Statutes, the state superintendent of public schools shall apportion to each town the amount of three dollars for each person returned in the school census for said town.

Sec. 8 On the basis of information furnished to the state superintendent of public schools by the return of educational statistics for the year ending July first (1922) . . and annually thereafter as provided for by Section fifty-one of Chapter sixteen of the Revised Statutes, the state superintendent of public schools shall apportion to the several towns the amount available for this purpose on the basis of the aggregate attendance of pupils in elementary and secondary schools maintained by those towns.

An Act for the improvement of sanitary conditions in school building toilets. (Chap. 33, P. L., 1921.)

Sec. 1. In order to safeguard the health and morals of the children of the state, towns shall from their regular appropriations or from special appropriations for the purposes of this act provide sanitary and protected and clean toilets.

Sec. 2. On and after the first day of September, nineteen hundred and twenty-four, all school building or buildings used for school purposes shall be provided with toilet facilities that shall be installed in such manner and location, as to insure privacy, cleanliness, and supervision by teachers . . . (The requirements are attached buildings and separate compartments and passageways from school rooms and corridors.)

A notable achievement was the designating of the week of Dec. 4-10, 1921, as American Education Week by the National Education association and the American Legion working together.

Some of the purposes of this week were to bring to the public a knowledge of the accomplishments and needs of the schools, cooperation, and support of the people in meeting the needs of the schools in each locality. This was emphasized in this state for the principles of law and order in organized society against principles that would destroy them. The opinion has been expressed that the average citizen does not keep posted on the work and advancement of the schools. The tax-payer should have first hand knowledge of what is going on in the schools. Constructive and sympathetic cooperation will yield the best results.

In the state and national proclamation for better schools our attention was centered upon such features as better buildings, public libraries and equipment, playgrounds, better attendance, organization of evening schools, health programs, safety programs, crusade against illiteracy, better English, revival of spelling and writing, and very fundamental good citizenship.

Such a program is the great need of every community to educate its citizens to an intelligent understanding of our national ideals and traditions.

Respectfully submitted,

GEORGE E. JACK,

Superintendent.

Report of the Principal of Samuel D. Hanson High School

To the Citizens of Buxton:—

The Samuel D. Hanson High School opened September 12, with 55 pupils enrolled as follows:— 7 Seniors, 15 Juniors, 8 Sophomores and 25 Freshmen, and as in the previous year, with Charles S. Bates, Eliza S. Libby and myself as teachers. Since the teachers were acquainted with the work and most of the pupils, there was very little time lost in getting "under way" at the beginning of the year. Elective blanks had been made out by the pupils of the upper classes during the last week of the spring term and thus most of the supplies were on hand at the opening of school and work was begun at once. Mr. Bates continued his satisfactory and efficient teaching in Latin and History with the addition of a class in first year Algebra, Miss Libby carried on her excellent work in English and Elementary Science, and thus French, Mathematics and Physics were left for myself.

A few changes have been made in the course of studies this year. The course in General Science begun during the winter of last year has been made a full year subject and appears to be one of the most popular and interesting Freshman studies. Beginners' French has been placed from the third year to the second. United States History is now offered in the fourth year instead of the third and Agriculture has been temporarily dropped. Following is the course of studies as rearranged:

FIRST YEAR	
Required	
English	5
Algebra	5
Ancient History	5
Elective	
General Science	5
Latin	5

SECOND YEAR	
Required	
English	5
Geometry	5
Elective	
Biology	5
Latin	5
French	5
Bookkeeping	5

THIRD YEAR	
Required	
English	5
Elective	
Physics or Chem.	5
Latin	5
French	5
Advanced Algebra	5
European History	5

FOURTH YEAR	
Required	
English	5
United States History	5
Elective	
Physics or Chemistry	5
Latin	5
French	5
Advanced Mathematics	5
Review Arithmetic	2

The numbers opposite each subject indicate the number of recitation periods per week. No pupil is allowed to elect more than four subjects without the consent of the faculty. Each pupil must complete before graduation 2 consecutive years' work in some language other than English and one year's work in either Physics or Chemistry.

It is hoped that a teacher of Agriculture will be added to the faculty when this course is returned to the curriculum. It is believed that this could be done with very little expense on the part of the town as there is a very liberal State and National Aid for such purposes.

Again it is necessary to bring to your attention the immediate need of more and better laboratory facilities. The present room is altogether too small and dangerous for effective work. With chemicals of various kinds, alcohol lamps and similar apparatus there is constant danger of fire in a room where every conceivable fixture and all the furnishings are inflammable. During the spring term of last year one pupil was badly burned through the use of such

material and had it not been for the alertness of other pupils considerable damage might have been done to the building. Again during the summer some slight damage was done by the combustion of certain chemicals and if some one had not been in the building at the time it is entirely reasonable to believe that it would have been destroyed by fire. By a few simple alterations in the basement this room could very easily be converted into a satisfactory and safe laboratory suitable for all science work.

There is also urgent need of a rest room of some sort in the building. With 60 or 70 pupils present daily it is not uncommon for some to be taken ill during the day. In such a case there should be a place to lie down, as many times it is unnecessary and unwise to go home, especially when the pupils live several miles from the school house and are dependent upon some other person for conveyance. Under present conditions pupils are obliged to place their wraps on the hard cement floor of the basement and lie there for hours, many times.

In making these suggestions it is realized that funds are rather limited and that the people are already somewhat burdened with taxes; nevertheless, it can hardly be considered economy or good sense to impair the health and safety of the children of the community for the sake of saving a few pennies per person.

Very respectfully,

JOSEF A. GREEN.

Report of Fire Warden

To the Mnnicipal Officers and Citizens of the Town of Buxton:—

I herein submit my report as Fire Warden, for the year ending Jan. 31, 1922.

February 1, dwelling of Julia Marshall caught fire. Estimated loss, $50. Cause of fire, overheated chimney. Insured.

February 21, camp of Stevens Sawyer, totally destroyed. Estimated loss, $200. Cause of fire, defective smoke pipe.

March 22, grass fire in Alonzo Harmon's field. No damage. Cause unknown.

March 23, grass fire at B. Shorden's, and H. H. Hill's. Damage slight. Cause, burning rubbish.

March 23, dwelling of Mrs. E. M. Smith, caught fire on roof. Damage, $15. Cause, sparks from chimney. Insured.

April 5, farm buildings of H. G. Richards, totally destroyed. Estimated loss, $3,000. Partially insured. Cause, overheated chimney.

April 14, grass fire at C. W. Douglass and L. P. Knights, burned over ten acres. No damage. Cause, burning brush.

May 22, woods fire in Appalachain Reservation. Damage. $100. Cause, sparks from a camp-fire.

May 22, dwelling of Grace E. Warren, caught fire on roof. Damage, $25. Cause of fire, sparks from chimney. Insured.

June 13, lightning struck buildings of Sarah B. Hol-

man. Damage, $35. There was no fire. Insured.

July 9, farm buildings, owned by Wm. H. Kemp, occupied by Percy Keatan, caught fire from defective chimney. Damage slight. Insured.

July 31, lightning struck buildings owned by W. D. Soule, occupied by George Stowell. Damage, $20. No fire. Insured.

August 23, grass fire in Fred Tyler pasture. No damage. Cause, burning brush.

August 28, Soule Bros. Box Mill was totally destroyed by fire. Estimated loss. $15,000. Cause of fire unknown. Partially insured.

Total estimated loss by fire and lightning, for year, $18,445.

Inspection

In the past year I have inspected 31 buildings. In some of these I found dangerous chimneys, and smoke-pipe connections. These have all been made safe, except three, (which are not in use), and these will be repaired as soon as weather permits.

In conclusion, I will call to your attention, the installing of furnaces in your cellars, and the danger existing from the chimney, if due care is not used when furnace is installed.

The chimneys in a majority of the houses in the country were not built for the purpose of being used for furnaces in the cellar. Consequently, in some houses I have found floor timbers resting on, or entering chimney at first floor. Where these conditions exist, the chimney is unsafe and dangerous, and should be attended to at once.

Also, if smoke-pipe from furnace is within two feet of floor, cover wood over pipe with sheet metal or asbestos board.

Respectfully submitted,

FRANK WEYMOUTH,

Fire Warden.
